Thanks for the table Nick.

Charlie's numbers came from the table below with the following taken into consideration: CBI/Ex. 4 is on CO Hold, CBI/Ex. 4 is not receiving field samples, both CBI/Ex. 4 are on a 10% restriction, and CBI/Ex. 4 is in the process of being awarded 100+ samples.

Shari and I looked in BIT and found that we have capacity for ~1000 samples.

Another thought is Terry Smith and ERLN.

See below.

What kind of lab capacity do we have for quick turnaround metals screening in water?

Do you know of field methods for rapid screening for metals in water?

Thanks,

Melanie

Need field methods for more rapid screening for metals in water. Also lab capacity is also a big issue. Any thoughts?
